

Org knit

TEC

February 16, 2021

Contents

1	Parameters	1
1.1	Exporting	1
1.2	Publishing	2

Let someone else take care of keeping up to date tangled/woven versions of your Org files for public consumption.

```
- name: Export org files
  uses: tecosaur/org-knit-action
  with:
    github_token: ${ secrets.GITHUB_TOKEN }
```

1 Parameters

parameter (default) description

1.1 Exporting

config (**false**) Path to either an `init.el` file, or a repository url for `~/.emacs.d`.
This also recognises Doom configuration repositories (`~/.config/doom`).

setup_file (**false**) URL for a `#+setupfile` to use in all Org files.

eval (**false**) Whether to evaluate code in Org files. Also accepts a list of globs specifying which Org files should be evaluated.

tangle (**false**) Whether to run `org-tangle` for each Org file. Also accepts a list of globs specifying which Org files should be tangled.

export (**html**) Comma separated list of formats to export to.

files (****/*.org**) List of org file globs to act on.

1.2 Publishing

github_token The GITHUB_TOKEN secret. Required to push any result.

branch (default branch) The branch to push files to

force_orphan (false) Force-push the created commit as the only commit on the branch.

keep_files (true) Whether to include non-org-related files. Also accepts a list of globs.

commit_message (Knit: !#) Commit message to use. !# is replaced with the triggering commit hash.

fragile (true) Fail the action if any export/tangle steps fail.
